

PATENT

COMPOUNDS DERIVED FROM ARYLCARBAMATES,

PREPARATION AND USES

CEREP

ABSTRACT

The invention concerns novel compounds, preparation and uses of same, particularly therapeutic. More particularly, the invention concerns compounds derived from arylcarbamates, preparation and uses of same, particularly in the field of human or animal health. The inventive compounds are preferably ligands of serotonergic 5-HT₄ receptors, and can therefore be used in the therapeutic or prophylactic treatment of any disorder involving a 5-HT₄ receptor. The invention also relates to pharmaceutical compositions comprising such compounds, preparation and uses thereof, and treatment methods using said compounds.
